

HIT AIR AUSTRALIA

## HIT AIR motorcycle airbag jackets and vests

Issue 6/2008

### *Why you should use an airbag motorcycle jacket*

#### **SPECIALISED & PATENTED AIRBAG IMPACT PROTECTION.**

- Your personal safety in an accident is significantly enhanced.
- Extensive development enables correct activation & protection of the riders' neck, chest, back, hips & bottom.
- The riders' spine is held immobile by the air splint to protect against injury.
- Several thousand systems sold in Europe & Asia. Many testimonials from riders involved in accidents.
- The **HIT AIR** airbag system is the original patented motorcycle airbag since 1995.

#### **CONTINUOUS ACTIVE IMPACT PROTECTION.**

1. As the rider separates from the motorcycle, the airbag activates instantaneously (within ½ a second). The air bag inflates with about 50L of gas to a pressure of about 35kpa and has a total length of about 2m.
2. The riders' body is not squeezed by the inflation. The expansion action is outward - stretching the jacket very taut. This improves abrasion protection and restricts catching, twisting or "riding up".
3. An impact causes the airbag to be partially compressed at that point. The air inside the bag is immediately redistributed and the pressure increases to spread the impact load over the wearers' body.
4. Any further additional impacts are continuously, actively and effectively absorbed and redistributed.
5. After activation the airbag will slowly deflate within 3-5 minutes and may then be very easily repacked.
6. The airbag may be reused if the airbag has not been damaged. A new CO2 cartridge is required (\$20). The triggering mechanism may be simply reset by the rider within 5 minutes. No other parts need to be replaced.

#### **Standard abrasion and armour impact protection.**

*HIT AIR* airbag jackets are made with high quality abrasion resistant materials.

Elbow and Shoulder CE approved armour and a back pad are fitted as standard.

Optional back/spine protectors and chest protectors are available.

### **HIT AIR JACKET OWNERS CLUB**

#### **Benefits:**

- Member website page access
- Product registration, Membership card (*tba*)
- 2nd Jacket \$A25 cash back (*conditions apply*)
- Product Referral Reward [\$A25 per jacket order]

#### **Merchandise:**

- Free CO2 cartridge (*conditions apply*).
- Accessories, Key ring, Stickers, Hit Air CDR/VHS
- Brochures, order forms, promotional info.
- Linked discounts: eg. m/c recovery service, insurance, ...

#### **Newsletter** (*½ yearly + special notifications*):

- Protective information & advice, FAQ, Surveys/responses
- Club Member connect and discussion
- Stories, accident reports, feedback from members

#### **Company news:**

- eg. New Model releases, exhibitions
- Statistical info, sales charts, regional news, new markets
- Media reports reproduced, International news, events

#### **Contacts:**
